

**Listing of Claims:**

Claims 1-9: (Canceled).

Claim 10: (Currently Amended) A method comprising:

receiving, ~~at a broadcast receiving device,~~ electronic programming guide data from a broadcast source;

receiving, ~~at a the broadcast receiving device,~~ a user request to modify an electronic programming guide configured to display the electronic programming guide data ~~to change at least one portion of an electronic programming guide at a predefined time;~~

~~receiving, at the broadcast receiving device, one or more criteria for making the user requested modification from the broadcast source;~~

determining, ~~at the broadcast receiving device,~~ whether the ~~predefined time has been reached~~ one or more criteria has been satisfied; and

in response to determining that the ~~predefined time has been reached~~ one or more criteria is satisfied, modifying the electronic programming guide in accordance with the ~~user request~~ user requested change to the at least one portion of the electronic programming guide.

Claim 11: (Currently Amended) The method of claim 10, wherein the ~~user modification requested change corresponds to~~ include ~~to a selection of a predefined display configuration layout from a database storing a plurality of predefined display configurations~~ layouts.

Claim 12: (Previously Presented) The method of claim 10, wherein the broadcast receiving device comprises a set-top box.

Claim 13: (Previously Presented) The method of claim 10, wherein the electronic programming guide comprises a three-dimensionally arranged set of surfaces textured by pre-processed broadcast program scheduling data.

Claim 14: (Currently Amended) ~~A~~ One or more computer readable ~~medium-media~~ storing computer readable instructions that, when executed, cause a processor to perform a method comprising:

receiving electronic programming guide data from a broadcast source;  
receiving a user request to ~~change-modify~~ at least one portion of an electronic programming guide configured to display the electronic programming guide data at a predefined time;  
receiving, from the broadcast source, one or more criteria for making the user requested modification;  
determining whether the predefined time has been reached one or more criteria have been met; and  
in response to determining that the predefined time has been reached one or more criteria have been met, modifying the electronic programming guide in accordance with the user requested change user request to the at least one portion of the electronic programming guide.

Claim 15: (Currently Amended) The one or more computer readable ~~media~~ medium of claim 14, wherein the user requested change corresponds to a selection of a predefined display ~~configuration-layout~~ from a database storing a plurality of predefined display layout configurations.

Claim 16: (New) The one or more computer readable media of claim 14, wherein the user request includes a change in a position of at least a portion of the electronic programming guide.

Claim 17: (New) The one or more computer readable media of claim 14, wherein the one or more criteria includes detection of a sound or a gesture.

Claim 18: (New) An apparatus comprising:  
a processor; and  
memory configured to store computer readable instructions that, when executed by the processor, cause the processor to perform a method comprising:  
receiving electronic programming guide data from a broadcast source;  
receiving a user request to modify an electronic programming guide configured to display the electronic programming guide data;

receiving, from the broadcast source, one or more criteria for making the user requested modification;

determining whether the one or more criteria have been met; and

in response to determining that the one or more criteria have been met, modifying the electronic programming guide in accordance with the user request.

Claim 19: (New) The apparatus of claim 18, wherein the user requested change corresponds to a selection of a predefined display layout from a database storing a plurality of predefined display layouts.

Claim 20: (New) The apparatus of claim 18, wherein the user request includes a change in a position of at least a portion of the electronic programming guide.

Claim 21: (New) The apparatus of claim 18, wherein the one or more criteria includes detection of a sound or a gesture.
